Founder, Regulatory Resources, LLC

FROM: W. Cabell Garbee, II, PE
Manufactured Products Engineer
NCDOT - Materials and Tests Unit

SUBJECT: Regulatory Resources
Bridge 73 and 96 Over the Straits at Harkers Island on SR1335
Letting Date - Proposed: July 21, 2020
NCDOT TIP: B-4863

Rich,

Based upon a review of materials that you have provided concerning the formation and mission of Regulatory Resources, we are looking forward to involving Regulatory Resources in our use of non-ferrous reinforcement in an upcoming project.

We accept your offer to provide a facility audit of a production site providing reinforcement materials (strand and/or bars) to the upcoming Harkers Island Bridge project. We will coordinate with you so that our team can shadow the audit while performing our required plant acceptance audit in order to compare and evaluate them.

We will invite you to review and comment upon the portions of the Harkers Island project provisions that are concerned with Fiber Reinforced Polymers.

We may involve Regulatory Resources in the acceptance testing of Fiber Reinforced Polymers, either via review and comment on our project provisions regarding sampling and testing of the materials or by direct participation in sampling and tests.

The above is based in part on your assurances that the above activities will be provided at no cost to the Department.

cc: Todd Whittington, PE, State Materials Engineer
Matt Hilderbran, PE, State Field Operations Engineer
